OLIGONUCLEOTIDES)	

SUPPLEMENTAL DISCLOSURE SUBMISSION

Commissioner of Patents and Trademarks
U.S. Patent and Trademark Office
Customer Window
Randolph Building
401 Dulany Street
Alexandria, VA 22314

Sir:

Supplementing the applicants' disclosure submission filed on October 22, 2004, the Examiner's attention is called to the patents and publications listed on the attached PTO-1449. The listing includes references cited in U.S. Patent 6,395,642 (which corresponds with WO 01/26692) except for WO 97/27266 which is already of record; and documents cited on pages 7 (the Journal of Applied Polymer Science reference) 9, (WO 99/09041 and its corresponding U.S. Patent 6,506,894 and WO 03/045969, corresponding to PCT/GB02/005177), 11 (WO 99/62922, corresponding to U.S. 6,642,373), and 13 (U.S. 6,096,881 and the Tetrahedron reference) of the applicants' specification. Copies of the listed U.S. patents are not included. The other references cited in 6,395,842 are also not included as copies of these were submitted in said patent. Copies of the other listed references are attached.

Page 10 of the applicants' specification also refers to the textbook "Protective Groups in Organic Synthesis", 1991, 309-345. This textbook reference has not been listed on

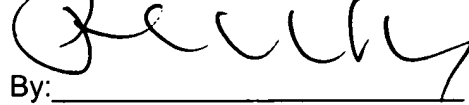

the PTO-1449 and copies of the indicated pages are not included as this is, in essence, general reference material. If, however, the Examiner wants copies of this or anything else which has not been provided, it is requested that the applicants be advised.

The Examiner is requested to consider this submission and the applicants' earlier submission in the examination of this application.

The Examiner's attention is called to the commonly assigned related Application No. 10/512,145.

Respectfully submitted,

MORGAN, LEWIS & BOCKIUS LLP
